

The “Europa” garden shed – fulfils the highest demands

Photo: Garden shed “Europa”, size 3

Everything tidy and well organised

Working in the garden offers us a meditative balance to counteract the hectic of the working day. Yet the search for the necessary tools can easily negate this positive effect. With the “Europa” garden shed everything is in it’s rightful place. Versatile shelving, tool holders and our organiser-system guarantee, that everything is always easily at reach.

The stable construction of high quality steel plate and security afforded by the cylinder lock offer not only protection from the elements but also against unwanted access by third parties.

Thanks to it’s unobtrusive design and the various colour schemes offered the “Europa” allows itself to pass harmoniously into it’s surroundings.

Standard equipment

- shelf set ① (2 shelves, 4 shelf brackets)
- 2 shelf sections ②
- 4 tool holders ③
- organiser-system on the inside of both doors (includes 6 utensil hooks) to store a variety of gardening tools
- twist handle with cylinder lock (includes reserve key)
- double locking pins fitted to both doors
- 2 integrated rain gutters
- the gutters fitted on both sides of the shed have outlets that allow the attachment of a 3/4 in. garden hose to collect the rainwater
- anchors and plugs for floor attachment included
- for the sizes 2A and 4A, 2 attachment profiles for wall mounting are included

Accessories (optional)

Side canopy

(Not available for sizes 1 and 2A)
These can be attached alternatively to the left, to the right or to both sides of the shed. The complete set includes all necessary supports and fixtures.

Floor frame (hot-dipped galvanised)

Gives the Biohort shed the necessary stability should you wish to erect it without a foundation on uneven surfaces (i.e. lawn). Four plastic corner plugs allow for a quick and accurate assembly. The ground anchors included ensure a secure fitting against stormy weather.

Floor frame

Shelf set

Tool holder

Window unit

Window unit

This complete side wall element with metal framed show window (of clear plastic) allows extra daylight into the garden shed (window opening 50 x 60 cm).

Shelf set/sections

With these you can convert your Biohort garden shed into a storage area for small items. (see also photo p. 10)

Shelf widths: 21 cm or 51,5 cm.

Tool holder

For convenient hanging of spades, rakes and garden hoses.

Rain water downpipe set

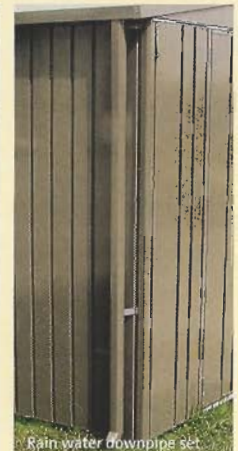

consists of two downpipes in matching colour with outlet elbows to draw off rainwater. L = 170 cm*, includes necessary supports and fixtures. (*downpipes for side canopy use, L = 150 cm – please state length clearly when ordering).

Bicycle holder "bikeMax"

- easily fitted into every Biohort garden shed
- can also be attached to other walls i.e. in garage (using screws and plugs enclosed)
- hanging hooks are height adjustable in 6 various positions
- integrated locking loop
