DuraMax Vinyl Storage Sheds are clad with the highest quality PVC on a strong steel frame and supports. These sheds provide safe and secure storage space to consumers. They are manufactured from a fire retardant durable PVC. They are also fade and weather proof, they will never rust, rot nor require seasonal application of sealants or paint.

OPTIONAL ACCESSORIES

STRONG Foundation Kits - available for each shed.

WINDOW KIT -
approx. 29" x 27" -
Fits All Sheds.

These heavy-duty, hot dipped galvanised steel frame kits are the perfect base for our DuraMax sheds. Easy to assemble before you construct the shed. No need for a traditional concrete or slab base - just perfectly level ground. After the shed is fully erected and secured to the foundation kit, flood out interior with concrete for a smooth floor or cover with timber or moisture resistant chipboard. A strong plastic sheet should be placed below the entire area covered by the foundation kit to prevent rising damp.

The assembly is simple, clean, safe, easy and can be completed in a few short hours. All parts are pre-cut, drilled and numbered for ease of assembly and packaging includes all necessary hardware as well as an illustrated step-by-step Instructional Booklet. All you have to provide is a levelled surface, of either wood or concrete that is the size of the desired shed. The quick and easy assembly makes DuraMax Vinyl Storage Sheds the perfect solution for all storage/hobby needs.
