

Trimetals has been established for over 30 years and are firmly placed as Europe's leading producer of quality metal storage buildings.

The unique designs which maximise strength and rigidity are unmatched by any other manufacturer and our commitment to a 15 year panel guarantee is your assurance that our range of buildings are the very best available.

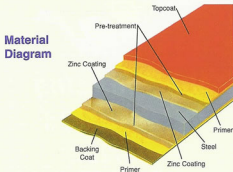

Please do not confuse our products with cheap and flimsy substitutes or plastic alternatives - our buildings are strong, secure, fire resistant and maintenance free - giving **real** value for money.

We pride ourselves in our reputation for superior products and are sure you will be completely satisfied with any product in our extensive range.

TITAN SHEDS & GARDEN STORES 15 Year Panel Guarantee*

All buildings are precision manufactured from modern PVC coated galvanised steel which is approximately 50% thicker with twice the paint thickness of most comparable products.

*Trimetals buildings have a 15 year replacement guarantee against rust perforation on all undamaged PVC coated panels. The diagram below illustrates the composition of the maintenance free panel material.

FIRE RESISTANT

To conform to National Building Regulations and restrictions on mobile/holiday home parks the panels used on all Trimetals buildings have been approved to the following:

'Class 0'

Fire rating in accordance with tests carried out to BS476: Part 6 (Fire Propagation)

'Class 1'

Rating part 7 (Surface Spread of Flames)

A certificate of fire conformity is available on request and supplied with each product.
