

UNDER-VAN STORAGE UNIT

TRIMETALS

NEW
PRODUCT

This new product is the ideal solution for sites with limited space or who have restrictions on the use of external sheds and stores.

Our undervan storage units are supplied fully assembled and are produced from PVC coated galvanised steel which is guaranteed for 15 years. They are also maintenance free and fire resistant.

The front door, which is completely removable, features stainless steel hinges and includes an integral keyed lock for security.

As an optional extra a wheeled trolley (see diagram) is available; items placed on this can easily be stored or retrieved from the back of the unit.

Four sizes are available but custom sizes can be produced subject to a minimum order of 25 units.

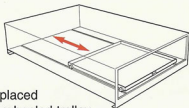

DIMENSIONS

Model No	Height	Width	Depth
UVS434	18"(46cm)	43"(109cm)	48"(122cm)
