

Easy steps to installing under laminate floors

1) ensure floor is clean and free of dust and debris.

2) Apply the Therm-All insulation onto the sub floor.

3) Lay out your heating mats onto the insulation.

4) Stick down the heating mats using the self adhesive tabs.

5) Lay the wires between the mats and into the junction box

6) Lay your laminate floor on top of the underfloor heating.

Ribbon Underfloor Heating

15
Year manufacturer
Warranty

Save
£££'s
on existing
heating costs

Space aged
and
space saving
technology

Suitable
to fit under
ANY FLOORING
as main heating
source

The benefits of the new amorphous metal ribbon underfloor heating system.

- Fits under any floor covering inc. carpet & vinyl
- Heats to optimum temperature in 3 minutes
- Wide ribbons giving greater floor area coverage
- It is a primary heat source (no radiators)
- Ideal for any building old and new.
- Massive savings on existing heating bills.
- Easy to install and highly programmable

15 Year Manufacturer Warranty

As with all new technology there are many benefits compared to its older predecessors. The amorphous metal ribbon system was designed to overcome the problems inherent with the older copper cable system.

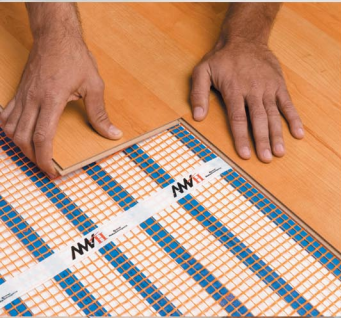

Our system uses space aged technology once used in space exploration, we have now brought that same technology to your homes as the perfect alternative to any other forms of heating.

Heating in the future

With oil and gas being in short supply and the fact that both give off higher carbon emissions than electricity, the government is striving to put in place policies meaning we should use electricity as it is less harmful to the environment and is a renewable energy source.

By using our system not only will you save money but you will also be doing your bit for the environment

Controllable comfort

Our underfloor heating is highly controllable with a seven day digital programmable thermostat, each day has four settings making it highly efficient.

Insulation

It is important that you use a good insulation when installing underfloor heating, we offer two types which we have manufactured specifically for underfloor heating, this again makes our system very efficient.

Heating mat sizes (150 Watts Per Square Meter)

Width of the following mat sizes are all 0.5m

1m, 1.5m, 2m, 2.5m, 3m, 3.5m, 4m, 4.5m and 5m

Widths of the following mat sizes are all 1m

1m, 1.5m, 2m, 2.5m, 3m, 3.5m

As you can see there is enough variation in sizes to ensure you get the maximum coverage of any room no matter what the size.

Tried and tested

Our underfloor heating was installed into one of Finnforrest's log cabins in Scotland it was used as a case study and benchmark for the Finnforrest range of cabins.

The test results show that our underfloor heating is efficient and will work as a primary heat source in the Finnforrest range of cabins.
